

# SARVESH SHARMA

Full Stack Developer | Data Analyst

+91 9146324098 Nagpur, Maharashtra worksarvesh05@gmail.com

Portfolio: [worksarvesh.github.io/Portfolio](https://worksarvesh.github.io/Portfolio) [Worksarvesh](#) GitHub: [github.com/Worksarvesh](https://github.com/Worksarvesh) LinkedIn: [linkedin.com/in/sarvesh-sharma-432738354](https://linkedin.com/in/sarvesh-sharma-432738354)

## OBJECTIVE

---

Full Stack Developer with hands-on experience building end-to-end web applications — React, TypeScript, Node.js, REST APIs, and AI-integrated automation pipelines — combined with a strong analytics foundation across ETL, SQL, and machine learning-driven business insights. Skilled in shipping production-style features from frontend UI to backend orchestration, with strong problem-solving ability and a track record of turning raw data or manual workflows into automated, decision-ready systems.

## TECHNICAL SKILLS

---

- Full Stack Development: React, TypeScript, JavaScript, Node.js, Express.js, REST APIs, Tailwind CSS, Vite
- AI & Automation: Google Gemini API, LLM Prompt Engineering, n8n Workflow Automation, OAuth 2.0, Gmail API
- Databases & Backend: SQL, MongoDB, Supabase (Postgres), SQLite, JWT Authentication, Row-Level Security
- Programming & Analysis: Python (Pandas, NumPy), Statistical Analysis, Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing
- Machine Learning: scikit-learn, Regression, Classification, K-Means Clustering, RFM Analysis, Random Forest
- Visualization & BI: Power BI, Streamlit Dashboards, Matplotlib, Seaborn
- Tools & Frameworks: Git, GitHub, Flask, Jupyter Notebook, VS Code, Excel
- Core CS: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

## PROJECTS

---

**ApplyBot AI — AI-Powered Job Application Automation Platform** | React | TypeScript | Node.js | n8n | Google Gemini | Supabase

- Built a full-stack AI job-application platform that researches a target company, tailors resume bullets, and generates a personalized cold email end-to-end, replacing a fully manual copy-paste workflow.
- Designed an n8n orchestration pipeline (Webhook → company website scraping → Gemini generation → structured JSON response) that turns raw company data into a company-specific, placeholder-free cold email.
- Implemented Google OAuth via Supabase with Gmail API integration so each user sends applications directly from their own Gmail account — no shared credentials, no manual email client.
- Architected a Supabase (Postgres) schema with row-level security to persist every sent application and power a live application-tracking dashboard.

[GitHub: github.com/Worksarvesh/applybot-ai](https://github.com/Worksarvesh/applybot-ai)

**CommerceIntel — E-Commerce Sales Analytics Platform** | Python | SQL | Power BI | Flask

- Architected an end-to-end ETL and BI pipeline (9 stages) to ingest, clean, and visualize raw sales and inventory data into decision-ready insights for revenue and retention strategy.
- Applied RFM (Recency, Frequency, Monetary) analysis and K-Means clustering to segment customers into distinct purchasing-behavior groups, enabling targeted marketing.
- Trained a Random Forest churn prediction model achieving 82% recall in identifying at-risk customers, validated via 5-fold cross-validation ( $70.2\% \pm 1.4\%$  accuracy), enabling proactive retention targeting.
- Wrote structured SQL queries (joins, aggregations, grouped reporting) against a SQLite database to track revenue trends, inventory movement, and operational KPIs in one place.

**Gesture Control — Real-Time Gesture Recognition System** | Python | MediaPipe | OpenCV | Flask

- Optimized a real-time hand-tracking pipeline with MediaPipe, classifying seven distinct gestures for low-latency, hands-free YouTube playback control.

## EDUCATION

---

**Shri Ramdeobaba College of Engineering and Management, Nagpur**

B.Tech in Information Technology | 2022 – 2026 | CGPA: 7.14 / 10

Relevant Coursework: Database Management Systems, Data Structures and Algorithms, Statistics and Probability, Machine Learning Fundamentals, Computer Networks

## CERTIFICATIONS

---

- SAP Certified – Data Analyst (SAP Analytics Cloud) | Issued: Jan 2026 | Valid till: Jan 2027
